

FLANDERS~PRECISIONAIRE

Disposable Air Filters

EZ Flow

EZ Flow disposable filters are designed for protection of furnace and central air units in residential and light commercial applications. The EZ Flow features a metal media retainer on the downstream side. The frame is made from heavy chipboard in a one-piece design that eliminates corner separation. The filtering media is continuous filament spun glass. A resinous bonding agent provides rigidity and resistance to media compression. Standard 12 filters per carton.

Important Features

- One-piece frame
- Metal media retainer
- UL 900 Class 2
- UPC marked
- 1/2" depth also available

Pleated Panel Filters

The new MERV 8 Pre Pleat 40 filter features a filtering medium that is more efficient AND ecologically friendly. Made entirely from recycled materials, this medium achieves MERV 8 efficiency with low resistance to airflow. It is also unaffected by high humidity and is hydrophobic (non-moisture absorbing.)

Economy, Standard and High Capacity designs are offered.

Important Features

- Media maximizing V-pleat design
- Expanded metal grid prevents media flutter while in operation
- Average efficiency is 30-35% per ASHRAE 52.1-92
- Average arrestance is 93%
- MERV Rating 8 per ASHRAE 52.2-99

FLANDERS~PRECISIONAIRE

Cut-to-Fit

Kwik Kuts

15" x 24" pads of filter media that can be easily cut to fit any window or wall mounted room air conditioner. They are offered in spun glass, foam, expanded aluminum, plastic-backed foam and Permaire media.

Permaire

Besides its cut-to-size advantage, Permaire is also more durable than disposable panel filters. It is easier to handle and install...you can carry several cut filters or even a roll to the job site. Bend or twist it to facilitate installation and it snaps back to its original shape. It has high dust holding capacity, offers inventory convenience and economy...AND it is washable for repeat use.

Hammock Rolls

Hammock style filter material is intended for furnaces equipped with "hammock" grids for frameless filters.

Flanders Precisionaire hammock rolls are available in nominal 1 inch spun glass, 2 inch spun glass, and 1 inch polyester synthetic fiber media.
