Fastener Drive

Nutsetters

Nutsetter Sets - Lobular

IRWIN®Nutsetters stand apart from the competition by combining unsurpassed magnetic power and high performance materials to give you total control of the fastener.

Lobular Design

- Drives the fastener on the side instead of forcing the corners to turn
- Maintains the true shape of the fastener, dramatically reducing breakage and stripping damage
- Provides more clearance on the corners of the fastener where paint build-up can occur

Features

- Magnetic nutsetters use magnets that are 4x more powerful than common magnets
- Positive retention of the screw improves installation rate
- Universal 1/4" hex shank fits most power tools and quick-change chuck adapters
