

Wow! Look at These products designed to save you time & money!

### KE2 Evaporator Efficiency

True defrost on demand - Eliminates unnecessary defrosts

- Up to 40% energy savings
- Monitor and control remotely
- Reduces compressor runtime
- Eliminate excessive defrost temperature swings

KE2 Evaporator Efficiency controller reduces energy used by the evaporator coil in refrigeration systems through precise control of defrost cycles and associated controls.

- Factory tested and UL listed
- A complete package with 2 temperature sensors. Controller can be mounted on the coil or remotely.
- Alarms can be automatically e-mailed or texted
- Simple installation with quick start menu
- Apply on new systems or retrofit on existing equipment
- No need to break into the system to install
- Apply with mechanical expansion device, or for additional savings use with an electric expansion valve

NEW ITEMS

### KE2 FanControl

Packaged solution for variable fan control

- Up to 58% energy savings on an 8 fan unit
- Eliminates complicated wiring, and possibility of errors during installation
- All components included and properly sized for voltage and current requirements

KE2 Fan Control is a complete packaged solution with frequency inverter for simple, energy efficient, fan speed control

- Factory tested, UL listed control panel
- Fully wired contains VFD, circuit breakers, motor overloads, bypass contactors, and electronic head pressure control
- Suitable for multi-fan applications, including air cooled condensers on refrigeration and air conditioning applications
- Simple, fast, installation with selectable head pressure setpoints; suitable for outdoors
- "Clean" reverse direction fan operation

Doin' the green thing.

Because saving energy saves more than just money.

Do you have questions about HVAC refrigeration? Call your nearest Meier Supply! Let our specialists provide application support for your HVAC&R needs!
