

## New Mitsubishi Authorized Training Center

In August 2010, our Buffalo, NY branch opened a Meier University and Mitsubishi Authorized Training Center (MATC). We will be conducting Mitsubishi factory authorized training and hands-on training here. Only six of these state of the art centers exist in the nation and you'll find the latest VFRZ technology on display with fully functioning Mitsubishi Advanced HVAC Product systems including City Multi and M & P series.

### 2010 - 2011 TRAINING

The following is a tentative list of training to be held this year at a Meier University training center. For more details, please check out the training page on our website at: <http://www.meiersupply.com/Trainingatbranches.htm>. If you are interested in a class that does not appear on our list, please contact your local branch manager or the training administrator listed on this flyer.

**ALL CLASSES WILL BE HELD AT  
ONE OF OUR TRAINING FACILITIES**

# MEIER UNIVERSITY

**“Leading the Heating, Air Conditioning,  
and Refrigeration Industry with First-Class  
Technical and Business Training.”**

## ABOUT MEIER UNIVERSITY

**M**eier Supply provides more than just equipment and parts, we reinforce this with our philosophy of “Customer Satisfaction Guaranteed.” Our goal is to partner with our customers and provide them with the tools necessary to be successful in their business. We’ve aligned ourselves with reputable manufacturers that supply high quality products, we compliment this with support and service that is second to none and training programs on just about any industry topic.

Meier University has been created to provide technicians and business owners with complete and comprehensive training in all aspects of the HVAC&R industry. Classes include manufacturer-specific service training, business training and customized training programs to enhance the skills of those who attend. All technical courses are designed towards service technicians and will incorporate hands-on training when available. Meier University utilizes a two-tiered training approach by providing classes for both intermediate and experienced technicians.

Intermediate classes are more fundamentally based and provide a perfect opportunity to freshen up on the basics. These courses teach the essential core skills needed to assess and troubleshoot basic general service calls encountered in the HVAC&R field.

***At Meier University, we trained over  
1,200 technicians in the Spring of 2010!***

Advanced technician classes are more specific and include a minimal amount of basic theory. Participants will gain the expertise needed to service and troubleshoot more complex service calls.

Meier University offers the highest level of training in the industry and the knowledge necessary to effectively service and troubleshoot HVAC&R equipment.

Our classes will give technicians the tools necessary to effectively troubleshoot any piece of equipment, not just a specific product. These are custom classes designed by Meier Supply to meet the needs of our customers.

## Customer Training Programs

The Meier Supply Company philosophy, “**Customer Satisfaction Guaranteed**” extends long after the sale is complete. We support our customers with ongoing technical training, product updates, and by making our experienced staff available when you need them.

## About Meier Supply Company

Meier Supply Company, Inc., a wholesale distributor of heating, cooling, ventilation, and refrigeration products, celebrated their 50<sup>th</sup> anniversary in 2007, and was founded in 1957 by the Meier family. The company is currently managed by the third generation of the Meier family and employs several members of the fourth generation. We have more than 100 employees and 17 branch locations in New York and Pennsylvania. Our executive offices and 45,600 square foot distribution center are located on Brown Street in Johnson City, NY.

## About Our Technical & Training Specialist

Ed Brink joined Meier Supply in July of 2008 and is responsible for providing technical support and training for Meier Supply Company's growing HVAC/R business.

Ed holds an AOS degree in Air Conditioning/Refrigeration and Electrical Controls from State University of New York at Delhi. He has 20 years of field experience as a commercial service technician in the HVAC, Refrigeration and Controls industry. Ed is also experienced in servicing, installing and maintaining HVAC/R systems, including commercial refrigeration, commercial and residential heating/air conditioning (propane, gas and oil), as well as digital and pneumatic building controls systems.

Ed is a certified trainer for Mitsubishi and is a Diamond Service Group Member.

Meier Supply's training trailer will be on site during some of our classes. Get interactive troubleshooting with our heat pump training module or A/C system.
