SOLARIS® Ionization for Micro-Particulates & Fresh Air

This Needlepoint Bipolar Air Ionizer improves and freshens the air by breaking down odors, volatile organic compounds (VOCs) and other chemical/molecular contamination. The SOLARIS® Ionizer makes it possible to remove microscopic air contamination that passes through filtration. The generated ions are suspended in the air which electrostatically charge these micro-particulates. This process causes them to gather together which increases your filters' ability to catch the larger groupings.

The Ionizer facilitates the removal of:

- Smoke, smog, atmospheric dust, dust from roads and agricultural/industrial activity.
- Engineered nanoparticles found in everyday items such as cosmetics, building materials and some fabrics.

The Ionizer is best placed in air ducts just prior to filtration to best capture the grouped particulates. Ionization is also germicidal, which helps to disinfect the filter.

DESCRIPTION	ITEM ID	PRICE
Air Ionizer	SLX-PG5T	\$273.00

SOLARIS® UV lights—HVAC Equipment Disinfection

Germicidal UV light is an eco-friendly method to disinfect HVAC cooling coils, drain pans, blowers and other wet surfaces keeping them free of bio-growth.

- The HVAC system will no longer be a major source of HVAC-generated allergens.
- Cleaner coils will maximize HVAC efficiency and save energy. T3™ UV lamps provide 40% more UV intensity without increased power consumption.
- Lasts up to 18,000 hours, twice as long as typical UV lamps!
