#### **FEATURES**

- 1. Features a Scroll® compressor for maximum efficiency and quiet operation. .
- 2. Louvered condenser compartment for protecting the coil against yard hazards and/or weather extremes.
- 3. One-piece top with a deep flange to help keep water out of the unit.
- 4. Supply and return air openings feature a one-inch tall flange to prevent water migration into the ductwork.
- 5. Access panels have "weep holes" and channels to further help manage water run-off.
- 6. Side and down discharge options available on all models. All models are shipped ready for horizontal application.
- 7. Easily accessible blower section complete with slide-out blower. The RGEA14 comes standard with variable speed motor with adjustable airflow in heating and cooling. The variable speed motor also comes with a interface that allows for dehumidification when used in continuous humidistat. The variable speed system is capable of 1 inch external static.
- 8. Refrigerant connections are conveniently located for easy service diagnostics.
- 9. Condenser and evaporator coils feature enhanced fins for better heat transfer and rifled copper tubing for greater efficiency.

- 10. Inside the easily accessible furnace compartment is the draft inducer motor. This motor is specially designed for quiet reliable operation. In addition to the draft inducer motor, the in-shot gas burners and manifold efficiently regulate the flow of gas for combustion. These new gas/electric units also feature direct-spark ignition and remote flame sensors for added reliability and efficiency.
- 11. All units feature an internal trap on the condensate line eliminating the need for installing an on-site external trap.
- 12. Easily accessible control box.
- 13. Single point wiring simplifies installation.
- 14. Our gas/electric package units feature a tubular heat exchanger design. Tubular heat exchangers are more efficient and durable than older-style clamshell heat exchangers.
- 15. Thermal expansion valve standard on all models for superior superheat control, reliability, and energy efficiency at all operating conditions.
- 16. Filter drier standard on all models (not shown).
- 17. Rugged baserail included for improved installation and handlina
- 18. Complete factory charged, wired and run tested.
- 19. Molded compressor plugs.
